

Commercial & Residential Roof Trusses

Universal Forest Products®

Roof Trusses from Universal Forest Products

Variety of Sizes

Universal's trusses are available in sizes up to 90 feet.

Priced Right

We offer competitive prices today and every day. National buying power and efficient production processes give Universal a competitive advantage.

Variety of Species

Because Universal Forest Products is the largest solid-sawn lumber customer of North America's largest mills, we have continuous access to a variety of species, including SPF and SYP.

Fully Engineered

Universal has the expertise and technical background to design, engineer and custom build trusses to each customer's requirements. Our engineering group uses special computer software to make the design process fast and efficient.

Quick Delivery

We can ship to the yard or job site. Count on us to ship on time, every time.

Representative Near You

Call the location nearest you for more information and experience for yourself the quality trusses built by Universal Forest Products.
