

PRODUCTS FOR CONCRETE FORMING

www.ufpiconcrete.com

PLATED TRUSSES

- Designed and engineered to exact specifications
- Feature angled sides for ease of removal
- In-house design and support staff

BEAM SIDES AND EDGE FORMS

- Pre-built for greater convenience and lower cost
- Built to exact specifications in a factory setting
- Available in HDO, MDO or BB

DIMENSIONAL LUMBER

Pressure-treated Lumber

- Universal is the nation's leading producer of treated lumber, with 23 treating facilities nationwide
- Posts, timbers and plywood are available in a variety of treatments including ACQ, Borate, ProWood® Micro and ProWood Micro CA, the latest technology

Common Species

- SYP, SPF, Doug Fir
- Species varies by regional availability

All Grades and Sizes Available

Lacing Boards

- Commonly used as cross bracing
- 5/4x4 -16'

Lagging Boards

- Mixed species hardwood product
- Commonly used to build retaining walls
- Common sizes: 3x8 and 3x10 in 8' and 10' lengths

WET CURING BLANKETS

- UltraCureNCF™ is a full term indoor/outdoor seven day wet curing blanket ideal for slab on grade.
 - Provides thorough hydration
 - Less discoloration
 - More evenly cured slab
 - Maintains a 100% relative humidity condition on the slab for a seven-day curing period
- UltraCureDOT™ is a long term, heavy duty wet curing blanket ideal for bridge, highway, and vertical applications.
 - Provides thorough hydration
 - Less discoloration
 - More evenly cured slab
 - Maintains a 100% relative humidity condition on the slab for a 14-day curing period

LOAD TRANSFER

- The EZ Form® System consists of patent pending elements including the reusable, pre-slotted EZ Form board, the EZdowel® load transfer plate dowel, EZ Edge® protection system and EZbasketW™ for load transfer at control joints.
- EZ Form Dowel System virtually eliminates:
 - On-site sawing to create chamfer
 - Measuring for dowel holder alignment
 - Nailing dowel holders
 - Repairing crushed or paste filled dowel holders
 - Repairing cracks caused by misaligned dowels/dowel holders
 - Cleaning aggregate leakage under forms

SCAFFOLD PLANK

- LVL or dimensional
- Various sizes available

HELPING YOU TAKE FORM, POUR AF

PANELS

HDO

- Provides a paintable, architectural finish
- Common overlay configurations: 100/30 and 100/100
- Alternate overlay configurations available by request
- 20-40 pours per panel

MDO

- Provides a paintable matte finish
- Best used in multipour, repetitive applications
- Available in one- and two-sided compositions
- 10 to 15 pours per panel

BBOES

- Most economical upfront cost
- Best used when finish is not critical
- Yields a coarse woodgrain surface

PSF

- Provides a mirror finish
- Panels are two-sided
- Unbleached Kraft paper overlays with a typical weight of 26 pounds and a resin content of approximately 64-66%
- Commonly used for concrete forms, treadmills and limited interior applications
- Noncertified panel

FORMING BOARDS AND PRECAST PANEL FORMS

- Resists twisting, bowing and shrinking
- Ideal for tilt-up walls
- Available in LVL, LSL, OSB or dimensional lumber for a more economical option
- Available in variety of lengths and depths

I-JOIST FORMING BEAMS

- Ideal for concrete slab forming
- LVL or LSL beams and shores
- Available in variety of lengths, thicknesses and depths

OTHER PRODUCTS FROM UNIVERSAL

Products Subject to Regional Availability

Banak Wood Chamfer

- An imported product, Banak wood chamfer is perfect for forming angled corners

Composite Chamfer

- Ideal for smoother finishes
- For multiple-use applications

Moisture-Resistant MDF Reveal

- Ideal for use in applications with decorative edges

Wood Stakes

- Domestic and imported, grade stakes are a staple product for slab work
- Available in dozens of sizes

Universal Forest Products brings its nationally known sales and service model to concrete forming. We have created a team of product experts whose sole focus is providing a complete range of concrete forming products. Direct from one of our lumberyards or from the mill, Universal Forest Products has the broadest range of wood-based forming products that help you get the job done right, pour after pour.

ABOUT UNIVERSAL

Founded in 1955 as a lumber wholesale office serving the manufactured housing industry, Universal Forest Products today engineers and manufactures:

- Wood and wood-alternative products for Do-It-Yourself retail home centers
- Engineered wood components for the site-built construction market
- Specialty packaging, crating and components for the industrial market
- Structural lumber products for the manufactured housing industry

Universal is the nation's leading producer of pressure-treated wood and North America's largest manufacturer of engineered roof systems for manufactured housing and site-built construction. The company is America's leading buyer of solid-sawn lumber and is the largest customer of North America's largest mills. That translates into exceptional purchasing power, which is just one of the many benefits Universal customers enjoy.

The people of Universal have a work ethic and a collective determination unparalleled in American industry today. The company's senior management enjoys virtually zero turnover—most senior executives have been with the company for decades—which accounts for the breadth and depth of the company's knowledge and relationships.

Headquartered in Grand Rapids, Michigan, Universal is a publicly traded (Nasdaq: UFPI), multibillion-dollar corporation with many facilities across North America.
