

CUSTOM CONCRETE FORMING MATERIALS

# Commercial Structures

Helping you take form,  
pour after pour.<sup>™</sup>

When you need precision-cut lumber for your next commercial project, think Universal Forest Products. Universal supplies many types of wood forming products to commercial sites, such as high-rise buildings and parking structures. We deliver an array of forming materials including wet curing blankets, lagging boards, scaffolding, dimensional lumber, plywood, engineered wood products, plated trusses and joists, lagging boards, beam sides and more. For a smooth, high-quality finish, choose our phenolic architectural forming panels. We also supply the well-known Gates brand of wood forming systems for column forms and wall forming projects. And our custom-built wood joists allow for increased spacing, which helps reduce job-site piece count and labor.

From hand-set applications and panelized tables to wood forming systems, we have the product lines and the design, engineering and fabrication capabilities to support nearly any project. We'll even provide fabricated beam sides and panelized I-Joist tables, ready for the job site.

Universal quickly distributes custom concrete forming products, making commercial building job sites across the U.S. efficient and clean, with reduced labor, lead time and waste.

#### **Just-in-time forms**

When you build commercial structures with our custom forming material on a just-in-time basis, you'll understand our distinct advantage over other suppliers. Plus, we'll help your team stay on schedule and within budget.

By supplying just-in-time custom precut forms or a forming system we accelerate the process, keeping the project on track during the critical forming stage. Our just-in-time process virtually eliminates on-site form fabricating, and greatly reduces waste and cleanup efforts. A Universal representative will work with your crew on-site, to lend expert knowledge as needed and to ensure all of your custom forming needs are met.

Our mixed truckloads reduce job-site theft and improper form use. If you need less than truckload quantities or full mixed truckloads, we'll be there for you—just in time.

By running our own equipment, we are able to help with your just-in-time delivery needs.

### **National single-source supplier benefits**

By leveraging the production and service capabilities of our many nationwide facilities, we can deliver custom-specified forming products direct to the job site within two days. Our team will also control the delivery schedule when poor weather conditions arise, so products are not exposed to the elements for extended periods.

Working directly with our manufacturing facilities allows us to eliminate the middle-man—resulting in quick, accurate deliveries and big time savings. If custom forms are needed, our team will move quickly to get your order processed and delivered. When timing is critical or when product is needed in multiple locations, Universal delivers on time, every time.

Universal Forest Products brings its nationally known sales and service model to concrete forming. We have created a team of product experts whose sole focus is providing a complete range of products for concrete forming.

Direct from one of our lumberyards or from the mill, Universal Forest Products has the broadest range of wood-based forming products that help you get the job done right, pour after pour.

## About Universal

Founded in 1955, Universal Forest Products, Inc. is headquartered in Grand Rapids, Michigan and provides capital, management and administrative resources to subsidiaries that design, manufacture and market wood and wood-alternative products for many industries nationwide. Universal's subsidiaries also provide framing services for the site-built market and forming products for concrete construction.

Through its network of subsidiaries and affiliates, Universal Forest Products engineers and manufactures:

- Wood and wood-alternative products for Do-It-Yourself retail home centers.
- Engineered wood components for the site-built construction market.
- Specialty packaging, crating and components for the industrial market.
- Structural lumber products for the manufactured housing industry.

The people of Universal have a work ethic and a collective determination unparalleled in American industry today. The company's senior management enjoys virtually zero turnover—most senior executives have been with the company for decades—which accounts for the breadth and depth of the company's knowledge and relationships.

Universal's operations have facilities throughout North America.
