Helping you take form, pour after pour.™

Scaffold planks take a beating, so Universal Concrete Forming Products OSHA-stamped scaffold planks are made of durable, engineered wood LVL or solid-sawn dimensional lumber. These scaffold planks can withstand rain, snow, heat, cold, heavy loads, and wear and tear from numerous assembly and knockdown cycles.

The solid-sawn product is available as 2x10 and 2x12 (1-½"x 9-½" and 11-½") in a variety of lengths. The planks can be ordered clipped, rodded and branded. If you're looking for scaffold planks that are more resistant to twisting, cupping, splitting and bowing than solid-sawn lumber, LVL is your best choice.

The LVL scaffold plank is available as 2x10 and 2x12 (1-½" x 9-½" and 11-¼") in 12- and 16-foot lengths, and is end sealed/painted to prevent moisture uptake. This product can also be ordered rodded and branded.

#### **Plank options**

**Rodded Planks** To minimize splitting, Universal offers rodded scaffold planks. These planks have a metal rod inserted across the width of the piece, approximately 8" from the ends.

**Clipped Planks** To help extend their useable life, our clipped planks resist breakage when the scaffolding is dismantled.

**Branded Planks** Scaffold planks can be ordered as branded with your company name, in addition to being OSHA-stamped.

For typical scaffold applications, choose from our LVL or solid-sawn domestic planks. When your application calls for a lightweight plank, our imported scaffold planks are perfect for the job.

## National single-source supplier benefits

By leveraging the production and service capabilities of our many nationwide facilities, we can deliver custom-specified forming products direct to the job site within two days. Our team will also control the delivery schedule when poor weather conditions arise, so products are not exposed to the elements for extended periods of time.

Working directly with our manufacturing facilities allows us to eliminate the middle-man—resulting in quick, accurate deliveries and big time savings. If custom forms are needed, our team will move quickly to get your order processed and delivered. When timing is critical or when product is needed in multiple locations, Universal delivers on time, every time.

Universal Forest Products brings its nationally known sales and service model to concrete forming. We have created a team of product experts whose sole focus is providing a complete range of products for concrete forming.

Direct from one of our lumberyards or from the mill, Universal Forest Products has the broadest range of wood-based forming products that help you get the job done right, pour after pour.

### **About Universal**

Founded in 1955, Universal Forest Products, Inc. is headquartered in Grand Rapids, Michigan, and provides capital, management and administrative resources to subsidiaries that design, manufacture and market wood and wood-alternative products for many industries nationwide. Universal's subsidiaries also provide framing services for the site-built market and forming products for concrete construction.

Through its network of subsidiaries and affiliates, Universal Forest Products engineers and manufactures:

- Wood and wood-alternative products for Do-It-Yourself retail home centers
- Engineered wood components for the site-built construction market
- Specialty packaging, crating and components for the industrial market
- Structural lumber products for the manufactured housing industry

The people of Universal have a work ethic and a collective determination unparalleled in American industry today. The company's senior management enjoys virtually zero turnover —most senior executives have been with the company for decades—which accounts for the breadth and depth of the company's knowledge and relationships.

Universal's operations have facilities throughout North America. To learn more about Universal's concrete forming products e-mail concrete@ufpi.com, visit www.ufpiconcrete.com or call 866-730-3249. Visit www.ufpi.com for more information about Universal Forest Products.
