Floor Systems From Universal Forest Products

Floor System Solutions

Whatever your floor system needs, Universal Forest Products is your natural resource for low-cost, high-quality engineered wood products. Offering a full range of joist solutions, we provide our customers with every floor joist type. We have an engineered joist for every pricing and load bearing requirement.

Open Joist 2000® Floor Truss

An engineered floor truss with finger joinery and waterproof structural glue. Trimmable ends up to 5-1/2". Wide nailing flange and open webs for easy installation of electrical, plumbing and HVAC. Competitively priced with other engineered products.

Code of Approval

OPEN JOIST is code approved by BOCA, IBC, ICBO, IRC, SBCCI and CCMC and can be used in all parts of the United States and Canada. See NER 502 for more details.

Variety of Depths

• 9-1/4" • 11-7/8" • 14" • 16"

I-Joist

An engineered framing component with top and bottom chords and an OSB "web." Stronger, straighter, and more consistent in quality than dimension lumber. Lightweight and less waste during installation.

Code of Approval

Most I-joists are accepted by all major model building codes including BOCA, IBC, ICBO, IRC and SBCCI. Most manufacturers have their own evaluation report which can be reviewed on www.icc-es.org.

Variety of Depths

• 9 1/2" • 11 7/8" • 14" • 16"

Plated Floor Truss

An engineered floor truss assembled with pressed-on steel plates. Capable of carrying heavy loads and spanning long distances. 3-1/2" wide nailing surface, 2 x 4 chords and open webs to allow for easy installation of plumbing, heating, air conditioning and electrical wiring. Plated Floor Trusses are designed to exact specifications with a complete framing plan for truss layout.

Designed to Current Code Requirements

Our Plated Floor Trusses are designed according to current code requirements such as SBCCI, ICBO, BOCA, IRC, and IBC. Check with local code officials for more specific details.

Variety of Depths

• 12" - 24"
