

KEYSTONE

PICNIC TABLE

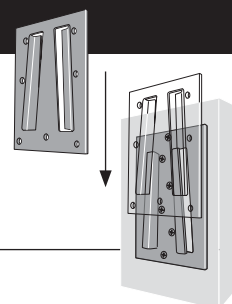

6' Picnic Table Kit

Assembles in 5 minutes!

Kit Components

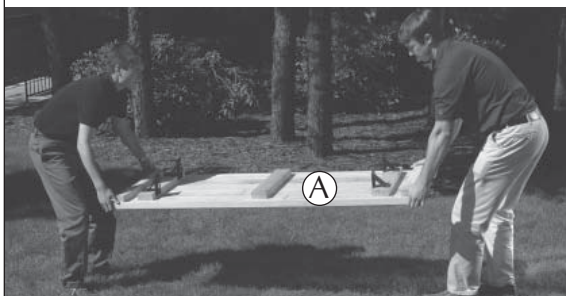

- A) 1 – Pre-assembled Tabletop
- B) 2 – Pre-assembled Table Legs
- C) 2 – Pre-assembled Seats

Note: Prior to assembling your table, apply two brush coats of water repellant to the table components.

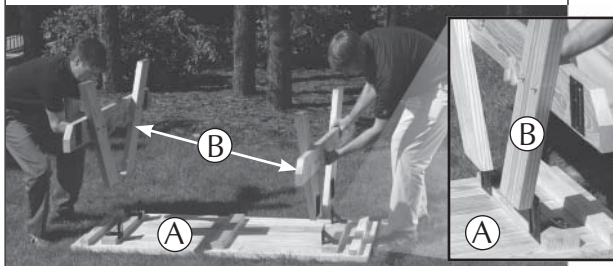

Step 1

Lay the pre-assembled tabletop (A) upside down on the ground.

Step 2

Attach the legs (B) to the tabletop (A) by sliding the connectors together. Tap on the legs to secure in place.

Step 3 - Optional

If you plan to leave the table assembled, the tabletop (A) can be secured to the legs (B) with the screws provided. Use a drill or screwdriver and attach a screw through each tabletop bracket and into the leg bracket. This will allow you to move the table without disassembling it.

Step 4

Turn the table upright.

Step 5

Attach the seats (C) to the cross supports. Slide one end of the seat into place. On the other end, as you lower the seat into place, re-position the cross support as needed so the connectors slide together correctly. Tap on the seats to secure in place.

Care and Maintenance

Congratulations on your new picnic table!
To maintain the appearance of the wood used to construct your table, we suggest performing the following maintenance biannually:

1. Start by cleaning your table with a cleaner/brightener that contains a mildewcide.
2. Apply an outdoor wood sealer that contains both a water repellant and an ultraviolet stabilizer.
