

For more information, view our Web site at www.postcaps.com

To activate your new solar post cap:

- *Remove top by pressing inward on the side of the clear lens, grasping the edge of the top and lifting it off.*
- *Install the batteries.*
- *Replace top by snapping onto side panels. (Ensure the holes in the sides are matched up with the stubs on the top.)*
- *Place your solar post cap in direct sunlight for 24-48 hours to fully charge.*

Your solar post cap light is now ready to be installed onto your post.

To attach your post cap to the post, apply exterior-grade construction adhesive to the underside of the post cap before placing the cap firmly on the post.
